

From a miner to a barber

Vladimir, an internally displaced person who had to leave his job as a miner in Donetsk and started working in a barber's shop, has received a grant for the purchase of professional barber's equipment and development of his own business, thanks to EU4Youth.

“ Today, the income from my interesting job allows me to support my family, to further develop my skills, and I now have plans to open my own barber's shop in the near future.”
