

Infrastructure
and Projects
Authority

The IPA and its International work

Infrastructure and Projects Authority

The IPA is the government's centre of expertise for infrastructure and major projects and PPPs.

Our core teams include experts in **all elements of project delivery**: infrastructure, IT, defence transformation, project finance and project profession capability.

We support the successful delivery of all types of major projects; ranging from railways, schools, hospitals and housing, to defence, IT and major transformation programmes.

Our purpose

We deal with every aspect of major project delivery. Our purpose is to drive continuous improvement in the way government delivers infrastructure and major projects.

Crossrail tunnels between Royal Oak and Farringdon

International Team

The IPA International Team supports the UK and partner governments around the world to deliver infrastructure using global best practices.

For close to two decades, we have collaborated with overseas governments, public sector authorities, regional development banks and multilateral organisations from across the globe to exchange experience, knowledge and ideas, and to promote sustainable infrastructure development.

To find out more about the IPA, please visit:

or search *Infrastructure and Projects Authority* on your search engine.

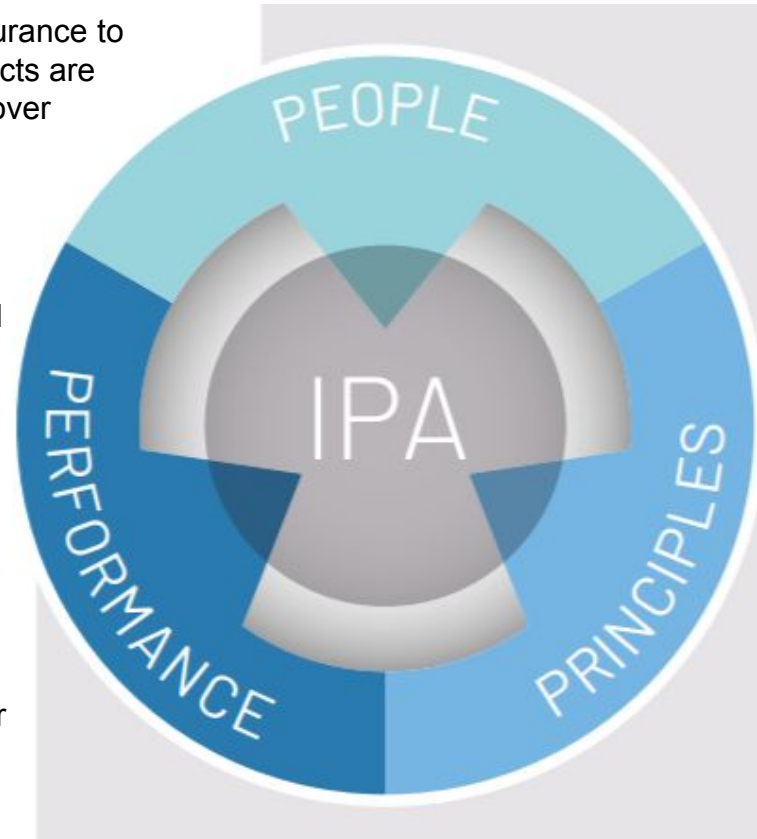

What we do

The IPA provides expert project delivery advice, support and assurance to government departments and works with industry to ensure projects are delivered efficiently and effectively, and to improve performance over time.

All our work is based around the “three Ps”

- **Principles:** successful projects rigorously apply fundamental principles and get the basics right for every project, regardless of size, even when there is pressure to take shortcuts.
- **People:** successful projects have people with the tools and capability they need to deliver. We need to build strong, flexible, professional and capable teams.
- **Performance:** successful projects understand how they deliver against promises is crucial. This is the ultimate core of what project delivery is all about – delivering something for the time, cost and outcome that we set out at the start.

International Team – our Footprint

1. Working with overseas governments:

- Providing policy, guidance, advisory and capacity-building **support to overseas Governments** of importance to the UK
- **infrastructure training programmes** in London for overseas officials

2. Working with UK government:
