# Data Infrastructure

Operational data management for Data Infrastructure

Presented by: PI Presales engineer

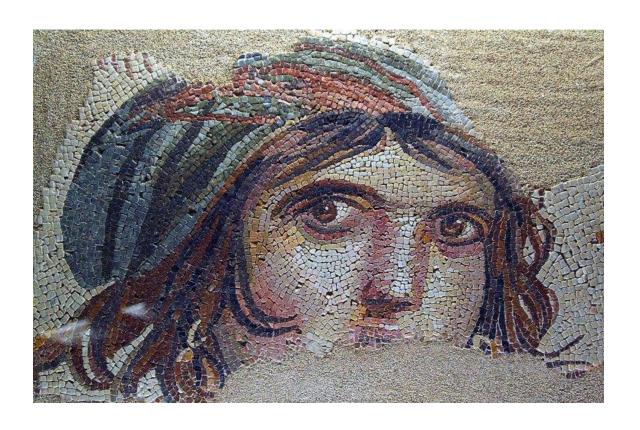

Byeongchul Yun

So, what can we do?

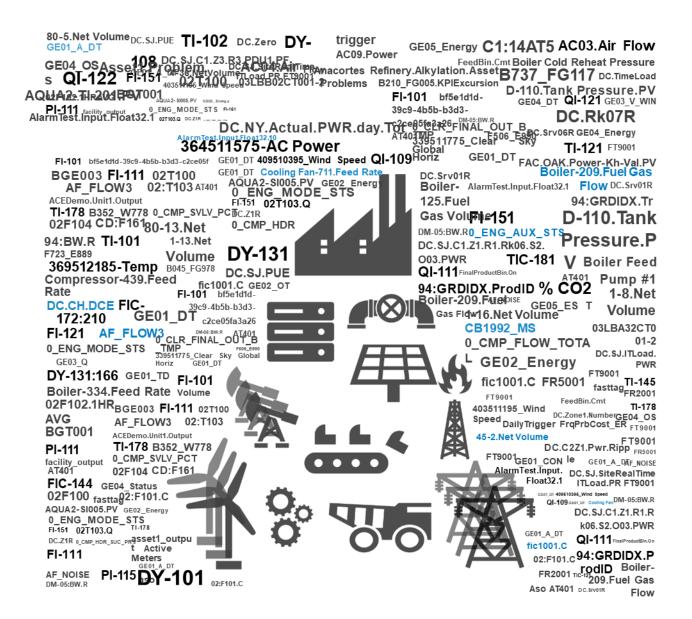

#### Structure Makes All the Difference

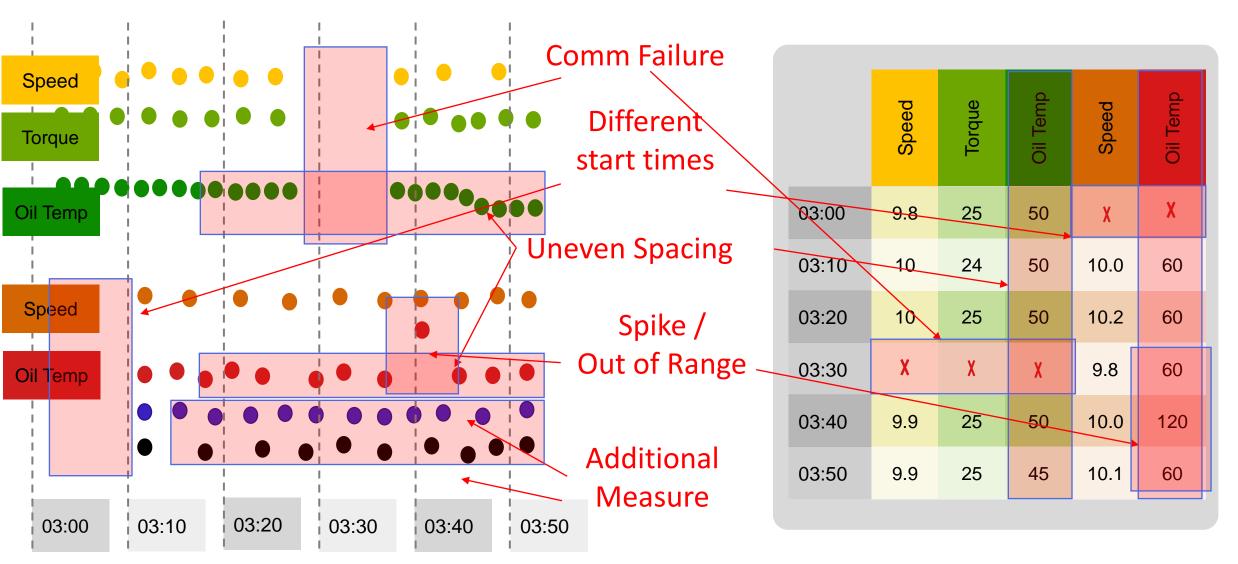

#### Can You Make Sense of Your Data?

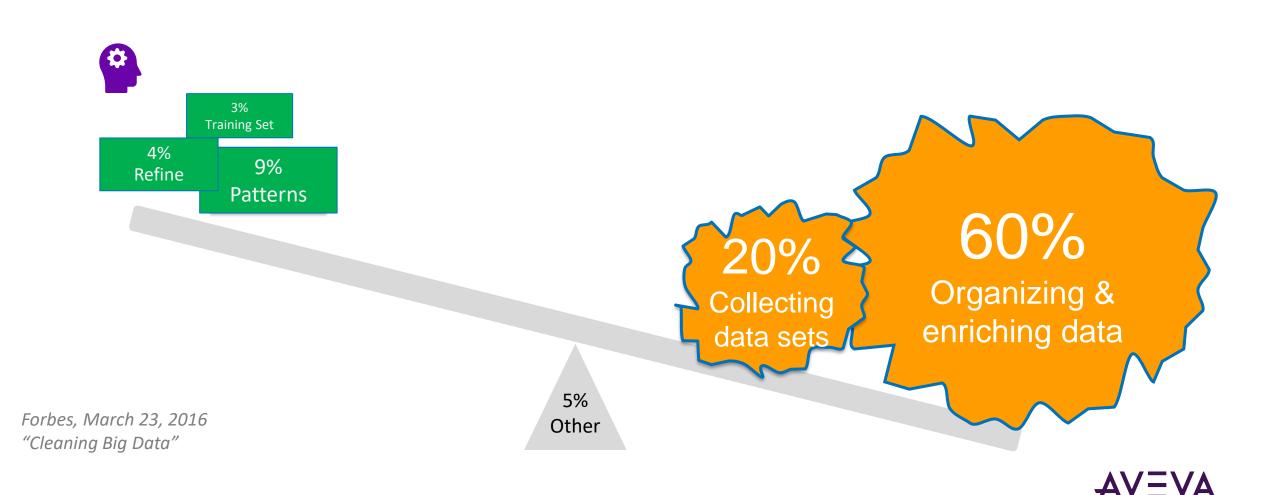

#### Time to Tables is Hard

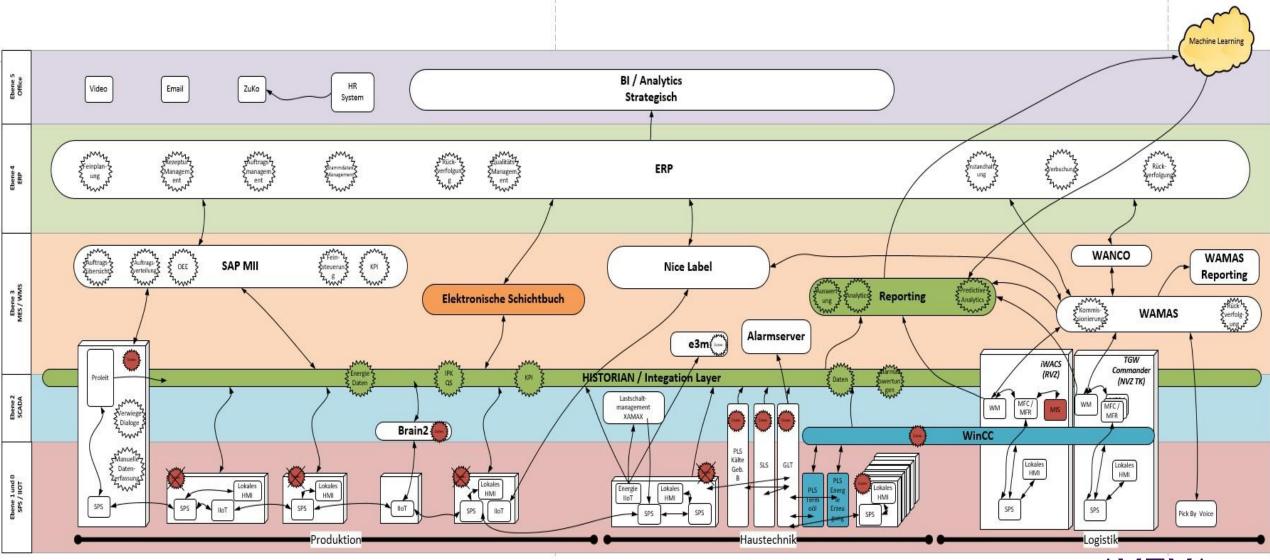

### 80% of Investment Lost to Data Preparation that could be automated

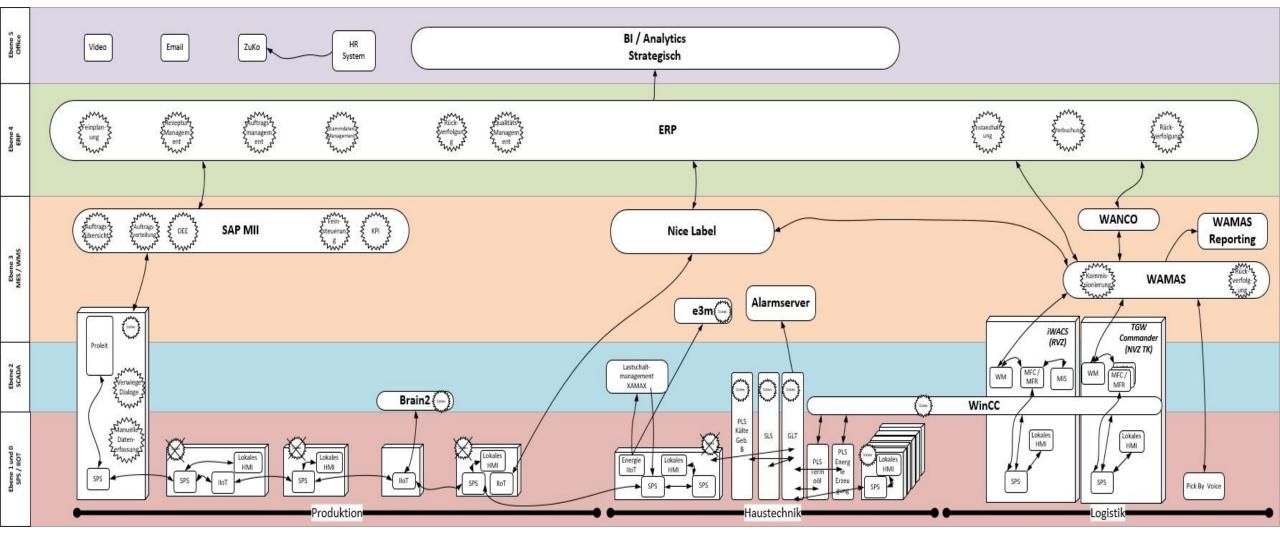

"It should be easy....shouldn't it?"

### where you want to be

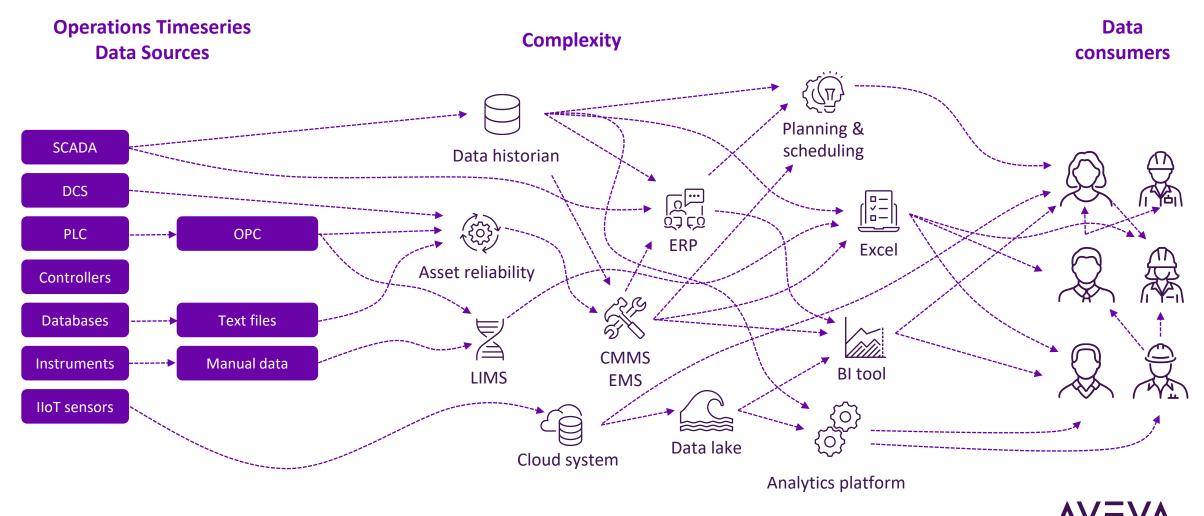

## where you are...

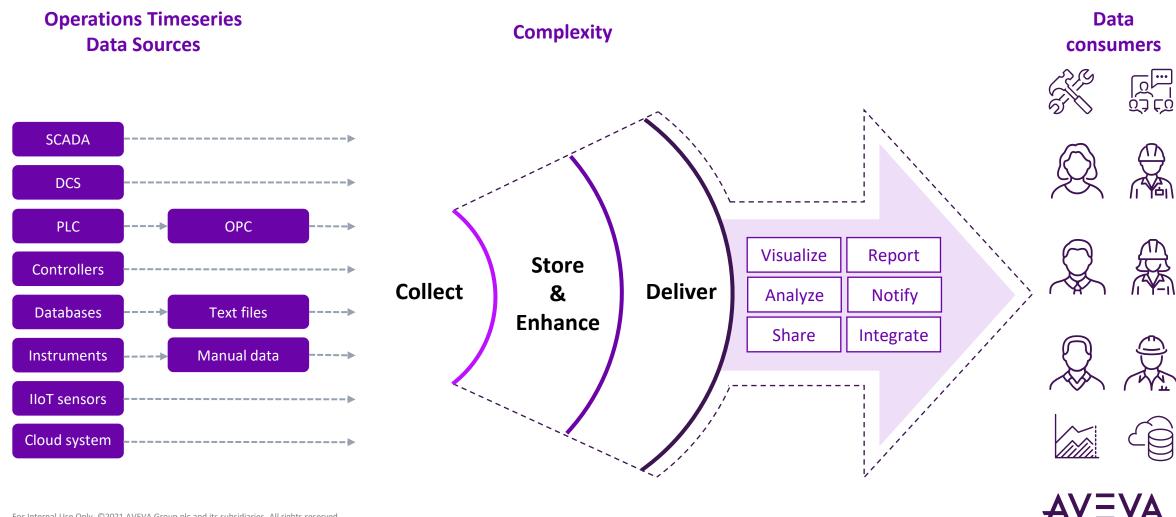

"Let us think one by one..."

### Managing Operations Data is Complex

## Taking the Data Infrastructure Approach

#### PI Connectors, PI Interfaces, PI Adapters

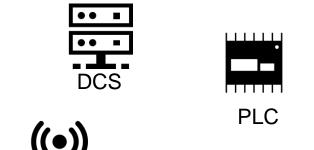

**IoT Sensors** 

#### Collects time-series and meta-data from any source

Store

and

enhance,

Collect

#### PI Manual Logger

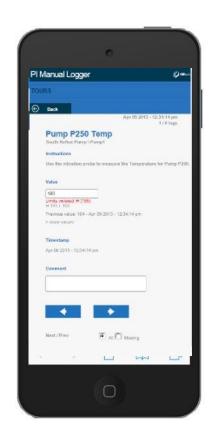

#### PI Manual Logger PC

- Configure tours
- Enter, review, edit, or approve the data

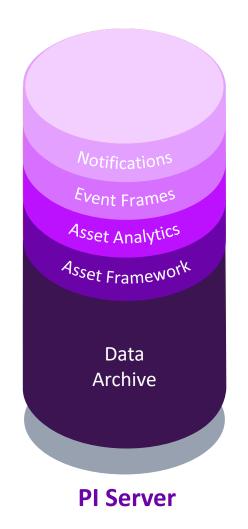

#### PI Manual Logger Web

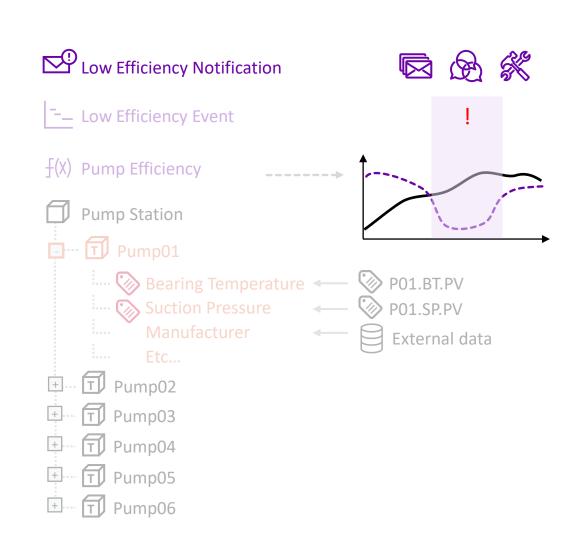

- Collect data from equipment with a mobile device
- Barcode to identify tags and/or enter data (Inateck BCST-10, Motorola CS3070)

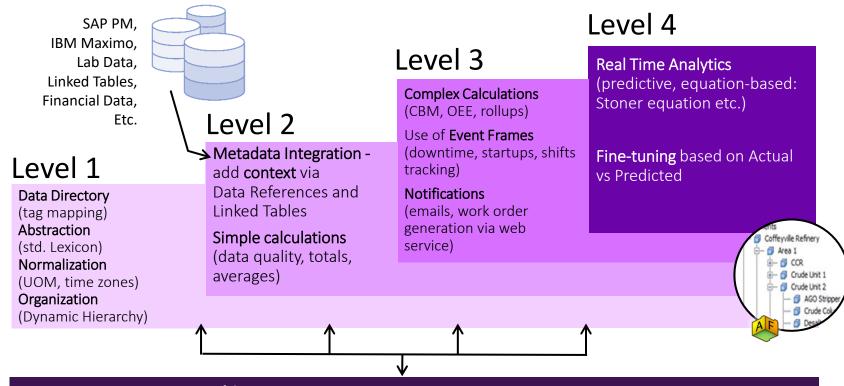

### PI Asset Framework Maturity Levels

"Start Simple but Simply Start" Kevin Milliman, DCP Midstream

#### **PI Data Archive**

- Tag-based, **High Fidelity** historical data ingress/egress
- "Rich" Time Series Data created by PI AF analytics & calculations (health index, efficiency etc.)
- **Future** Data (forecasts, projections etc.)

#### PI Vision

An easy to use, self-service, scalable visualization solution

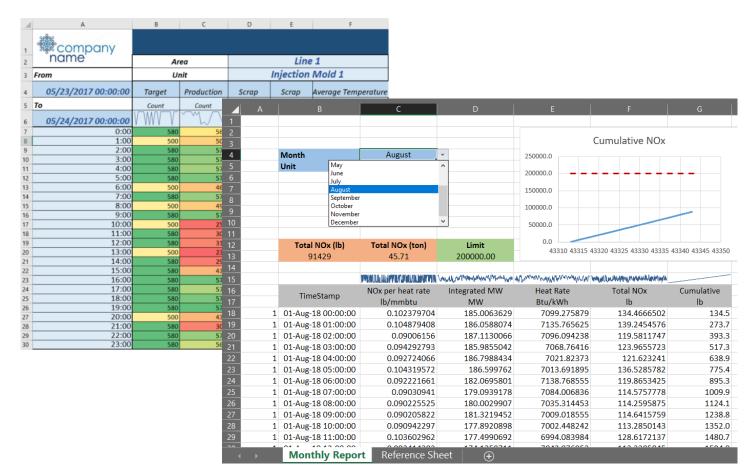

#### PI Datalink

#### Delivering PI System Data into Microsoft Excel

#### PI Integrators

Prepare, clean and deliver PI System data to external systems

- Connect to any BI platform
- Develop machine learning models
- Available for Streaming and Batch

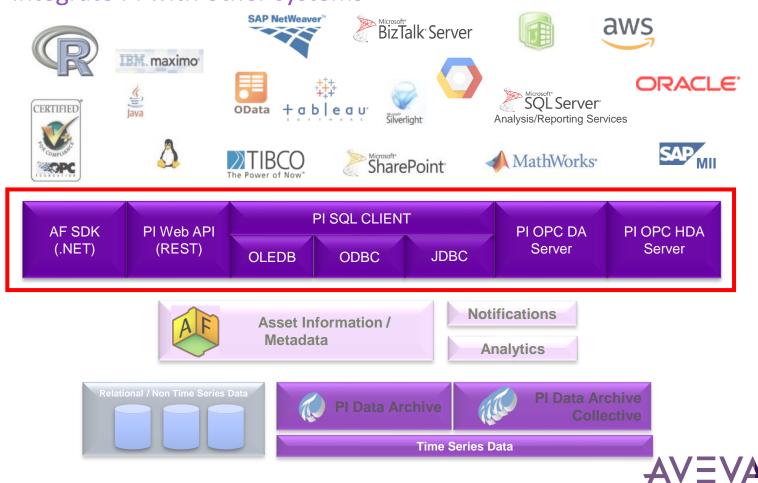

See your real-time data on a map

### PI System Access

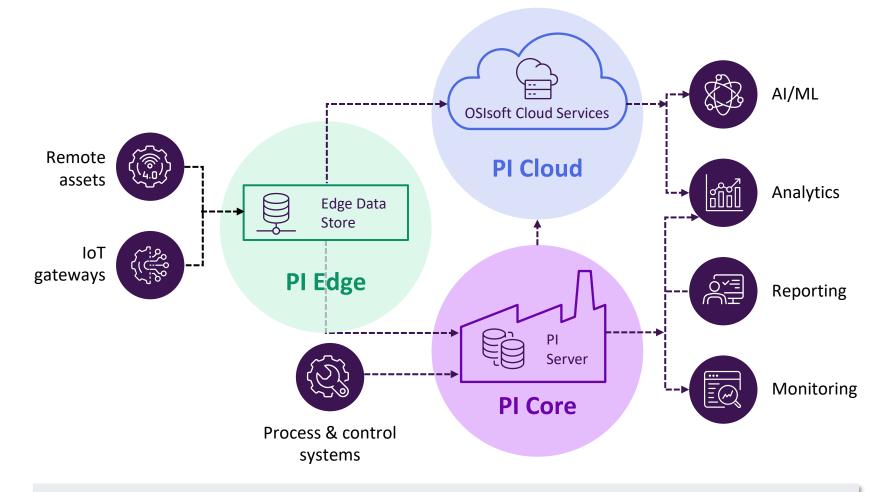

A **developer technologies suite** to build custom applications or integrate PI with other systems

### PI System

#### **PI System**

enables edge-to-cloud visibility and intelligence

**Secure** access to **structured** and **cleansed** operational data from its source to whomever and wherever it's needed

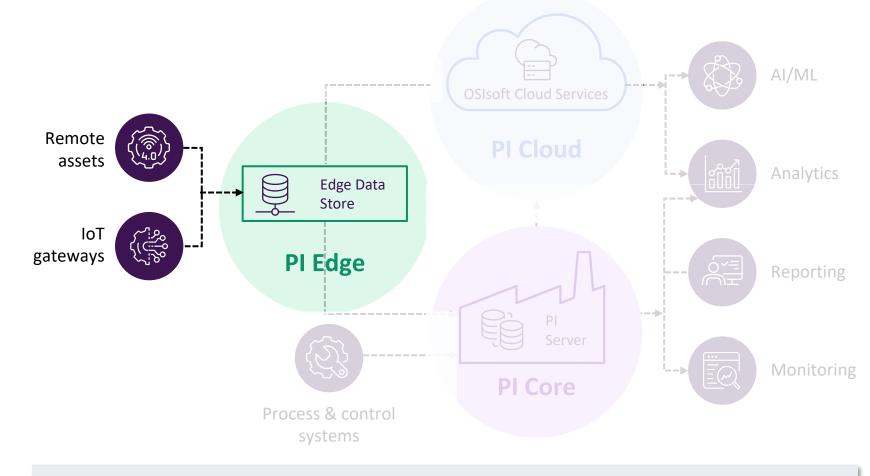

"Beyond On-premise, edge-to-cloud..."

### PI Edge

## Support edge IIoT patterns

Lightweight software supported on rugged devices

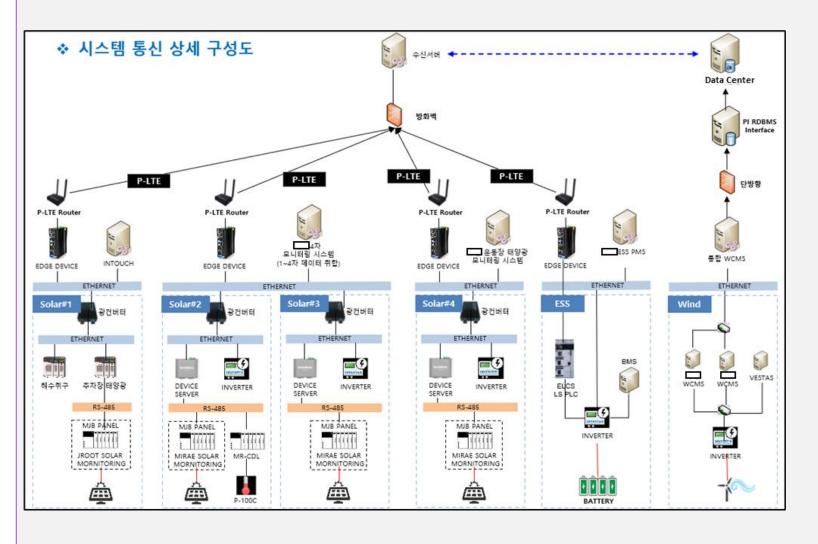

- Configuration options to optimize bandwidth
- Empower users in the field,
   beyond the four walls
- Enable high speed edge analytics

**Secure** access to **structured** and **cleansed** operational data from its source to whomever and wherever it's needed

#### PI Edge Reference

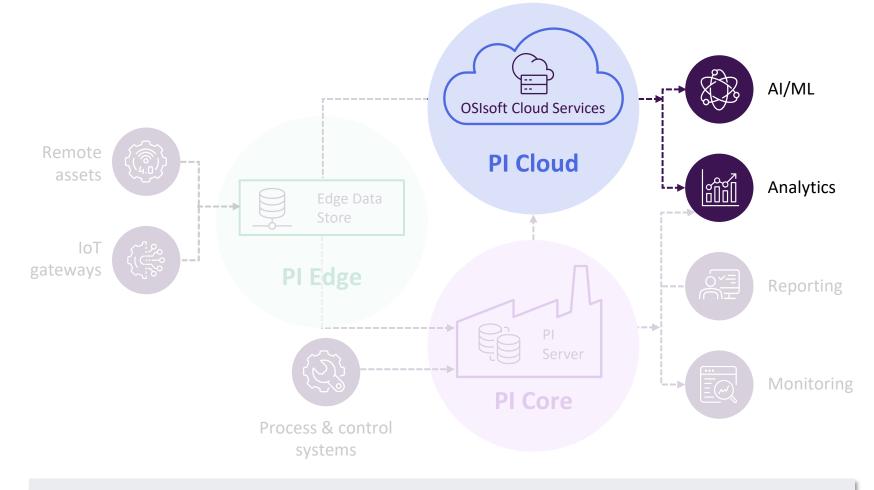

#### PI Cloud

# Analytics and data sharing at scale

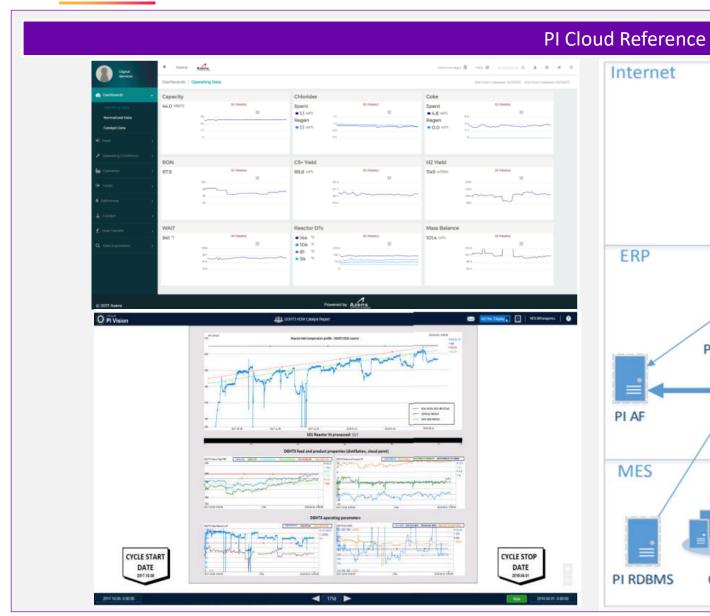

Cloud-native Managed Service built for elasticity and resiliency

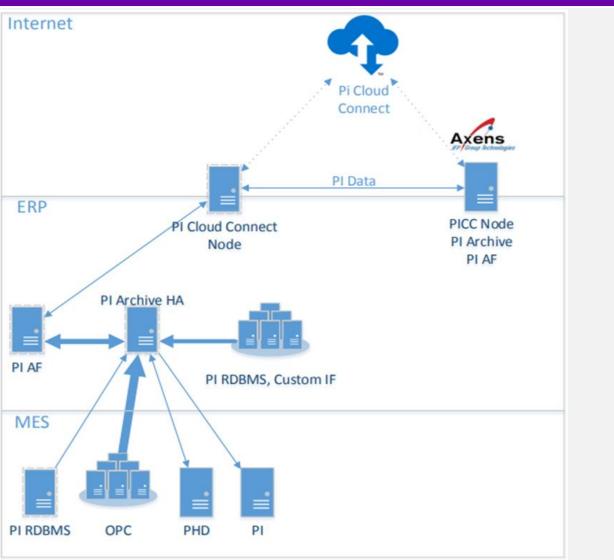

- Supports scalable cloud workloads for advanced analytics
- Data sharing creates new value networks

**Secure** access to **structured** and **cleansed** operational data from its source to whomever and wherever it's needed

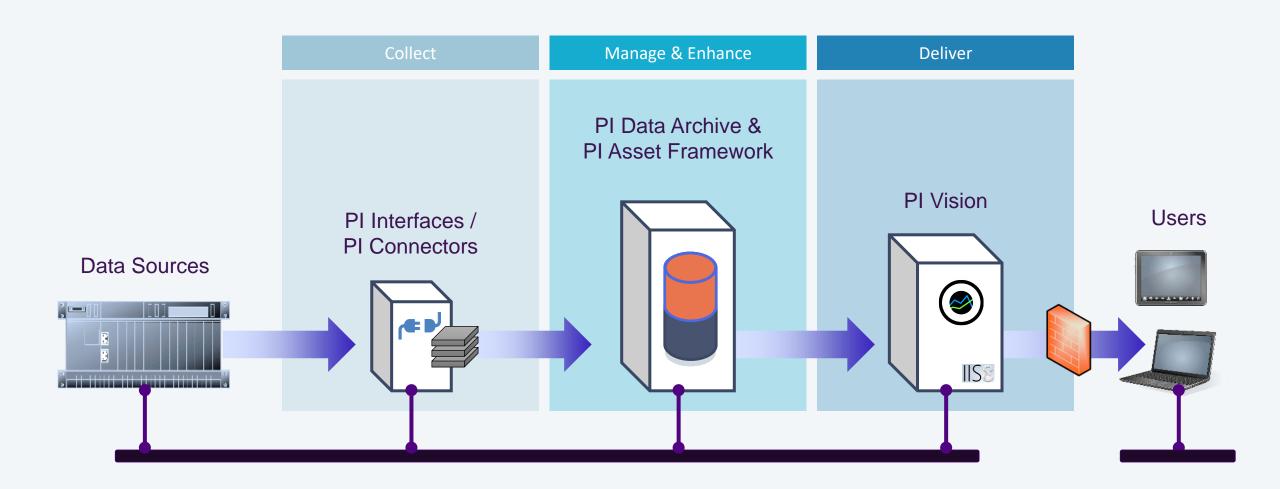

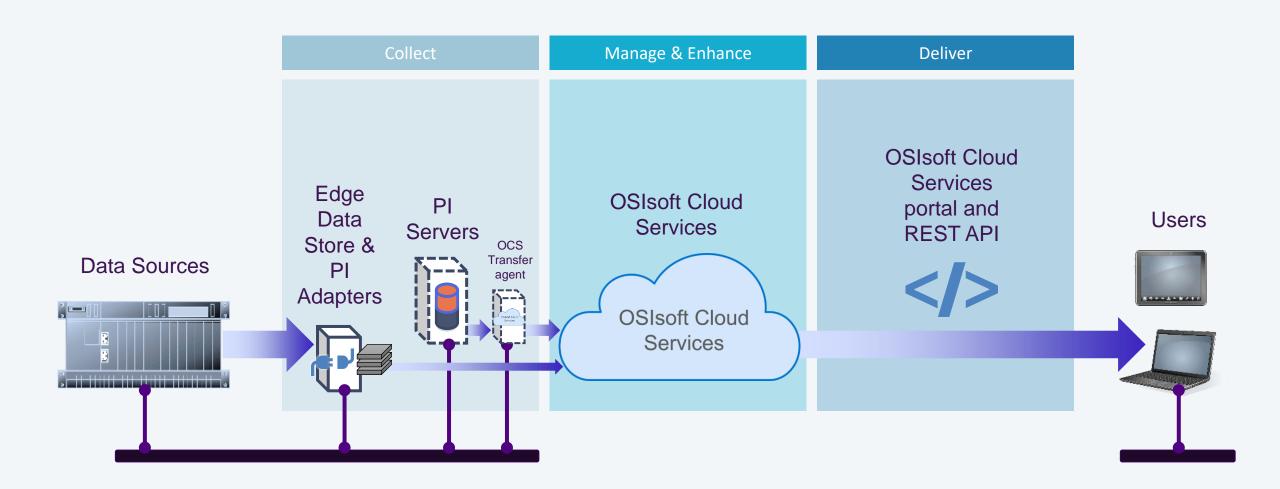

#### The PI Server provides a key component of the hybrid cloud

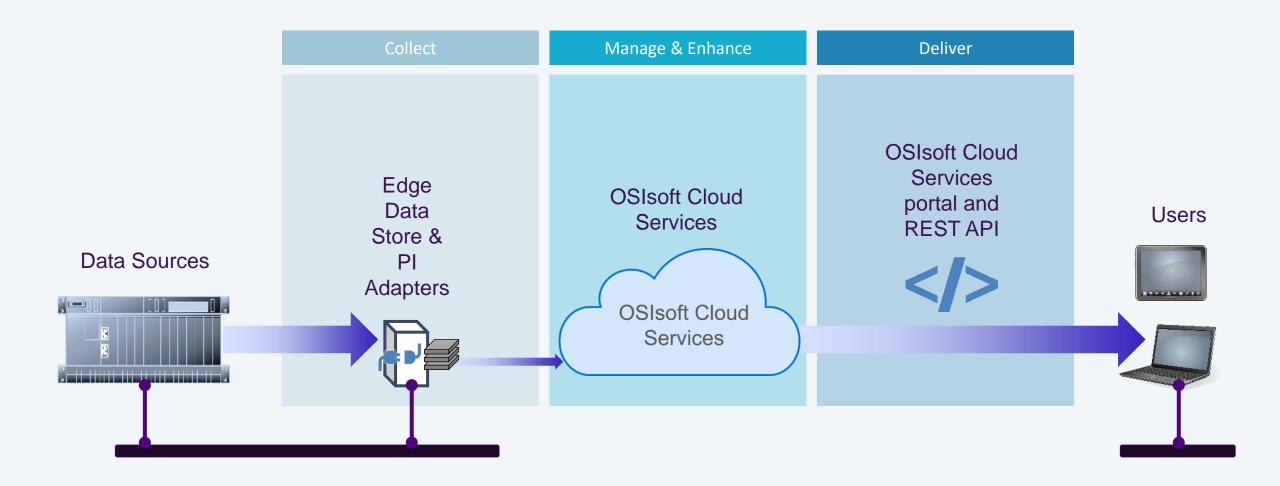

#### A complete hybrid on-prem and cloud architecture

#### PI Edge enriches the hybrid cloud with direct edge-to-cloud

"Better data. Better business outcomes"

### Rapid Time to Value

Data flowing,

monitored, visualized

across initial assets

(on-premises

and edge)

Deliver first use case: Define initial asset hierarchy and key metrics (uptime, total energy use etc.)

Payback from initial use case funds additional use cases, additional deployments etc.

Share data with business users, data analysts etc.

### Our Proven Success - Industry Agnostic

Equipment efficiency optimization & cost reduction

Saved \$20-25M in first year

Minimize energy usage by leveraging real-time data

Achieved 10x ROI from operational savings in first 8 months

Maximizing production & product quality

\$120M additional revenue by shipping 26M tons

**ArcelorMittal** 

Saving costs while saving the planet

Speed up response time by 13 hours and saved local oysters

Improving transparency and quality with right data

Postponed \$8M capital upgrade

Increase ability to react to volatile market

Operated over 3,452 days without lost-time accidents

+

+

### PI Server: trusted by essential industries for over 40 years

Oil & Gas

85%

of the top oil and gas companies

Power & Utilities

1000+

utilities worldwide

Mining & Metals

9

of the top 10 Mining companies

Pharma & Life Sciences

24

of the top 25 Pharmaceutical companies

Chemicals

9

of the top 10 Chemical companies

Manufacturing

6

of the World Economic Forum's
Factories of the Future

This presentation may include predictions, estimates, intentions, beliefs and other statements that are or may be construed as being forward-looking. While these forward-looking statements represent our current judgment on what the future holds, they are subject to risks and uncertainties that could result in actual outcomes differing materially from those projected in these statements. No statement contained herein constitutes a commitment by AVEVA to perform any particular action or to deliver any particular product or product features. Readers are cautioned not to place undue reliance on these forward-looking statements, which reflect our opinions only as of the date of this presentation.

The Company shall not be obliged to disclose any revision to these forward-looking statements to reflect events or circumstances occurring after the date on which they are made or to reflect the occurrence of future events.

#### **ABOUT AVEVA**

AVEVA is a global leader in industrial software, driving digital transformation and sustainability. By connecting the power of information and artificial intelligence with human insight, AVEVA enables teams to use their data to unlock new value. We call this Performance Intelligence. AVEVA's comprehensive portfolio enables more than 20,000 industrial enterprises to engineer smarter, operate better and drive sustainable efficiency. AVEVA supports customers through a trusted ecosystem that includes 5,500 partners and 5,700 certified developers around the world. The company is headquartered in Cambridge, UK, with over 6,500 employees and 90 offices in over 40 countries.
