CONTEXT

EU4Energy Programme Phase II is organising the Autumn Digital EU4Energy Week for Eastern Partnership (EaP) Universities in October 2023. In the framework of the EU4Energy Annual Regional Communication and Visibility campaign, this event aims to create an enabling environment for future energy professionals and not only, to gain hands-on knowledge and experience from international energy experts and have a possibility to ask and receive answers on their questions. It will bring together students from EaP universities with a background in energy, law, environment, economics, and EU member state energy experts to discuss the different aspects of EU energy market and principles of its regulation. The leading theme of the Digital Week 2023 is “transition” allowing to capture a broad range of energy issues.
