

# DENMARK

- **Food & Drink (sustainable consumption):** The way we produce, cook and eat food is transforming. Climate change, plant-based food (alternative proteins, vegan, vegetarian), food security and traceability, new technologies and an interest in health are some of the key trends. Opportunities for healthy eating & snacks, convenience, plant based products, organic and sustainable food solutions including packaging.
- **United Nations Procurement – Copenhagen:** The United Nations procured goods and services for almost \$30 billion in 2022. The United Kingdom is the 3th largest country supplier to the UN and procurement from UK suppliers reached a record high of \$1.3 billion. UN procurement covers a wide scope of goods & services. The top UN procurement categories include: health, pharmaceuticals, medical, lab equipment, management & admin services, engineering & research services, transport & logistics, IT & communications equipment.
