

Panel debate:

## Cross-modal R&D for Decarbonising Transport

Decarbonising transportation is a major challenge to reaching our Net Zero ambitions. The British Embassy in Copenhagen invites you to a panel discussion on ongoing and potential future cross-modal initiatives for decarbonising different modes of transport. The panel will identify benefits and challenges to cross-sectoral work in this area, including fuel production and efficiency, better implementation of existing solutions, regulatory barriers and more.

---

**When:** 31 January 2023 at 11-12 CET (10-11 GMT)

**Where:** [Link to livestream](#)

**Moderator:** Simon Masters, Deputy Director – Future Flight, Innovate UK

**Panellists:** Ann-Sofie Hörlin, Head of Sustainability, Scandinavian Airlines Systems

Dr. Dina Petranovic, Chief Scientific Officer, NNF Centre for Biosustainability, Technical University of Denmark

Dr. Tristan Smith, Reader in Energy and Shipping, University College London

Henry Tse, Director of New Mobility Technologies, Connected Places Catapult

---

The panel forms part of a Green Transport Day organised by the British Embassy in Copenhagen, gathering Danish and British actors across government, academia and industry to discuss opportunities and challenges for decarbonising the transport sector.
