

ICELAND

Iceland aims to be carbon neutral by 2040.

There is always an interest and demand in Iceland for project management, legal – and financial services from the UK.

- **Smart cities:** smart city solutions with innovative revenue models are of especial interest. Upcoming infrastructure opportunities in Iceland include airport, roads, tunnels and a new hospital.
- **Future of Mobility:** public transport (excluding rail), autonomous vehicles, EVs solutions and systems.
- **Sustainable Consumption:** there is a growing demand for more sustainable methods and products across all industries in Iceland. Any product or solution that focusses on reducing waste or emissions within relevant sectors is of interest.
